

ARCHITECTURAL GLASS BREAKING BOUNDARIES

As an Architectural Glass industry leader for over 20 years, Innovative Glass enables Architects and Designers to “Design Outside the Box.” From building facades, interior / exterior windows and room dividers — to staircase railings, pool and shower enclosures — our high-quality Bent Glass, along with our outstanding customer service and technical expertise, will make your ideas a reality.

WHAT IS BENT GLASS

Bent glass, also known as curved glass, is glass that has been bent into a rounded, concave, or convex shape. When heated it softens, then it is bent using a proprietary process, and left to cool into its desired shape.

WE OFFER A WIDE RANGE OF OPTIONS

- Curve radius from 40 inches to 20 feet
- Height range from 1 foot to 10 feet
- Glass can be tempered, laminated, or insulated with Low E
- Sold in 1/4", 3/8", and 1/2" thicknesses
- Colors: Clear, Ultra Clear Low Iron, Frosted, Bronze, Grey, Blue, Green
- More decorative design options
- Available with switchable LC Privacy Glass
- Can be installed in most demountable partition systems
- Ready to install with holes and cut-outs
- Mounting hardware available

PLUS — we provide Fast Quotes, Easy Ordering, Short Lead Times, Highly Competitive Prices, Expert Shop Drawings, and Technical Assistance!

Bent Glass-v1_7-2024

HOW TO SPECIFY

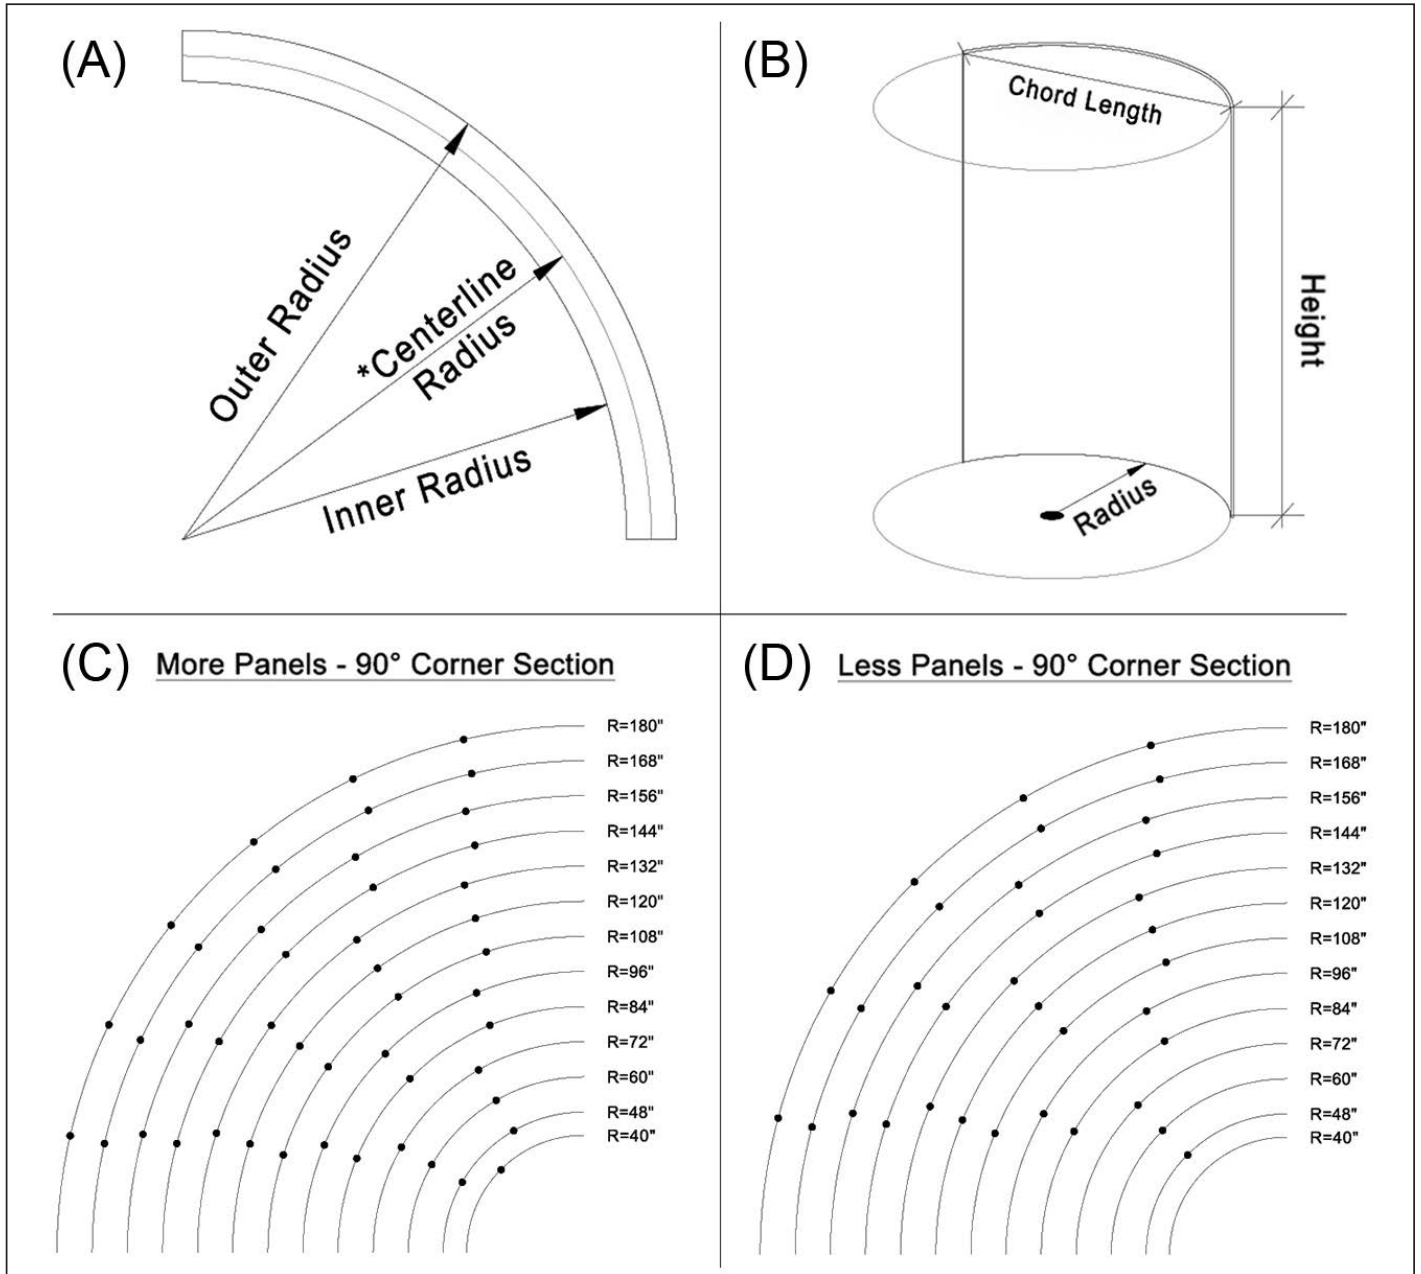

DIAGRAM (A)

Since glass has thickness to it, all our dimensions use the centerline of the glass.

DIAGRAM (B)

For field measurements, we recommend measuring the Radius and the unit Height. The Chord Length is a straight measurement directly across the two ends.

DIAGRAM (C)

90° Corner Section — Standard options for a larger number of panels.

DIAGRAM (D)

90° Corner Section — Standard options for a smaller number of panels.
